

**MYRA
TOKEN
WHITEPAPER**

ABSTRACT

Cryptocurrencies are decentralized digital currencies; therefore, they do not require the intermediation of any financial institution that represents a disruption in the financial system. Cryptocurrencies developed rapidly and became popular assets in global financial markets. It attracted the attention of individual investors and institutional investors. Cryptocurrencies have become an important and current issue.

With the introduction of cryptocurrencies into our financial world, it did not take long to spread to other areas.

Cryptocurrencies have been used in every area. For this reason, we wanted to show that cryptocurrencies can be used in social media applications, games, financial applications and many more. We are here with many projects where we will expand the usage areas of our MYRA token. This whitepaper contains the information of the MYRA token, the information of the project.

2. Introduction

Change, which is indispensable for our age, is mostly seen in technology. Decentralization, which has started to take place in our lives, especially with Blockchain technology, will be indispensable in the future. Blockchain has made itself known with cryptocurrencies such as bitcoin and continues to be developed with cryptocurrencies such as ethereum. At the same time, another area that is indispensable in our lives is social media platforms.

The use of social media is very common today. By analyzing these situations, our team comes up with a potential project that will both benefit the crypto world and lead investors. Imagine such a social platform that it will have a structure that will be indispensable for the future (decentralized) and will be managed by a group that speaks the same language as you and understands your problems and wishes. Our team is self-confident and likes to take risks when necessary. We reveal this feature in our projects. This project, which is both unique and pioneering in the crypto world, will provide a great opportunity to highlight our token and our team.

3. ABOUT MYRA

What is MYRA?

Myra Token is a structure that aims to provide a unique experience to the users by integrating current technologies into the blockchain.

What is the mission and vision of Myra?

Our team, who wants to take part in the growing crypto money industry and blockchain technology, aims to reach every person who is competent or not in this industry and technology. Our team, which goes on a long-term journey with the products it will develop, aims to grow together with you, our valued users, to become the most important crypto money in the world.

Is Myra Token or Coin?

Myra is a token because it belongs to a smart contract. Assets referred to as coins are those that have their own blockchain networks.

4. VISION

Our priority is to create a social platform that belongs to the blockchain world. Here you will be able to access up-to-date news, comments and information about blockchain.

Our team realized that there is no current and popular social platform belonging to the blockchain world. Today, expressing information and ideas so easily and quickly has played an important role in the realization of our project.

5. Projects

Our team continues to produce projects in order to expand the usage areas of MYRA token. Also, our team continues to develop projects for applications and products that have not yet been made in blockchain technology on the other hand, continues to complete and constantly research projects that are missing in the blockchain world. Below is our first project, BLABBER.

3.1. BLABBER LOGO:

Say hello to the latest generation blockchain-based application. With the Blabber application, you are very close to the world of crypto money. Sign up for the app and start reading Blabs. Earn and have fun here!

Users can register to the app, edit their profile, view Blabs, like and dislike Blabs. Users must have 2500 MYRA in their account to be able to Blab, like and dislike, no fee is required.

Program Features:

Individual users and cryptocurrencies can register. Users and cryptocurrencies can edit their profile, share Blab, advertise, tag, comment, follow other users, like and dislike Blabs. *In some cases users and cryptocurrencies are required to purchase Blue and Golden Ticks.

There are individual users "Blue Tick" within the application. The user pays 250,000 MYRA(100 USDT) per year to get the blue tick. *MYRA quantity will be updated by adapting to 100 USDT. Thanks to the blue tick, users can comment on Blabs and send messages to other users.

There is a "Golden Tick" for Crypto Coins in the application. Cryptocurrency pays 750,000 MYRA(300 USDT) per year to get golden tick. *MYRA quantity will be updated by adapting to 300 USDT.

Profiles			
Features			
Can Share Blab	✓	✓	✓
Can Send Message	✓	✓	✓
Can Like & Dislike	✓	✓	✓
Can Follow	✓	✓	✓
Can Advertise	✗	✓	✓
Can Comment	✗	✓	✓

Standard users must keep a minimum of 2500 MYRA in their wallets for message, like dislike and Blab sharing transactions while using the application.

Users must pay 3.750.000 MYRA(1500 USDT, for 1 day), 5.625.000 MYRA (2250 USDT, for 2 days) and 7.500.000 MYRA (3000 USDT, for 3 days) to open a tag. *MYRA quantity will be updated by adapting to 1500 USDT. The tag with the most Blabs appears in the top row.

Users can advertise within the app. 2,500,000 MYRA(1000 USDT, for 1 week), 4.375.000 MYRA(1750 USDT, for 2 weeks) and 6.250.000 MYRA(2500 USDT, for 3 weeks) must be paid for each advertisement. *MYRA quantity will be updated by adapting to 1000 USDT.

6. Token Economics

While creating tokens, our team, which takes into account the existing crypto money projects, has agreed on the following share and token amount:

Token Name: MYRA Token

Symbol: MYRA

Total Supply: 10.000.000.000

Decimal: 18

50% BURN

20% SALE

10% PRESALE

10% MARKETING

10% TEAM

Aiming to establish an anti-inflationary structure, our team assures its users that the amount of **tokens will not increase** except for the start.

When we examined the assets in the cryptocurrency industry, we noticed that most of the anti-inflationary tokens experienced problems in later processes or projects due to the “automatic burn” function that they added to their smart contracts at the beginning.

Our team, who wants to include current technologies and trends in the project processes, aims to serve you better by agreeing to do the "Burn" process, which is specified at 50%, manually. In this regard, the burning of the promised amount of tokens is guaranteed by our team.

7. Roadmap

In the first stage of the project;

Smart contract distribution on the Binance Smart Chain (BSC) network,

Publishing the website,

Publishing the social media accounts,

Presale stage,

Verification of the Smart Contract in the BSC network.

In the second stage of the project;

Publication of the social media platform

Listing on trending Market apps like Coinmarketcap, Coingecko,

Advertisements.

In the third stage of the project;

Listing on Centralized Exchanges,

Publishing the New Project,

Marketing Stage.

In the future, the decisions and changes made on Roadmap will be announced to our users via our social media accounts.

It should be noted that the Myra Token team can advance/postpone the dates of applications on Roadmap or **change** them for **the benefit of our users**. (According to the process)

CONCLUSION

The projects we offer are on blockchain. With the roadmap we have determined, we will increase the usage areas of MYRA token and make it one of the leading tokens in the industry. We will continue to develop products, applications and projects that can be used not only by our investors but also by the whole world.
